

FlashSuite Homepage — Google Stitch Master Prompt

Material Design 3 Redesign

CONTEXT & OBJECTIVE

Redesign the homepage of **FlashSuite** — a SaaS platform offering three core products:

1. **URL Shortener** — branded link management with analytics
2. **QR Code Generator** — custom, dynamic QR codes
3. **PDF Toolkit** — 11 browser-based PDF tools (crop, merge, split, compress, PDF to Word, PDF to Image, Image to PDF, protect, unlock, edit, sign)

The goal is a **full Material Design 3 (Material You) homepage redesign** — expressive, modern, and conversion-optimized. The output must be a complete, production-ready HTML page using Google's Material Design 3 principles, components, and tokens.

EXISTING PAGE STRUCTURE TO REDESIGN

Recreate ALL of these sections in M3 style:

1. **Top Navigation Bar** — Logo (FlashSuite + lightning bolt icon), nav links: Home, URL Shortener, QR Generator, PDF Tools
 2. **Announcement Banner** — "Branded Links • Custom QRs • NEW: PDF Tools"
 3. **Hero Section** — Headline, subtext, 3-tab switcher (Shorten Link / Create QR Code / PDF Tools), URL input + CTA button
 4. **PDF Toolkit Section** — Dark background section, 11 PDF tool cards in a 4-column grid
 5. **About + How It Works** — Two-column split: brand explainer card on left, 3-step numbered process on right
 6. **Why Choose FlashSuite** — Feature highlights: Lightning Speed, Deep Analytics, Advanced UTM Tracking, Dynamic QR Codes
 7. **FAQ Accordion** — 5 questions with expandable answers
 8. **Footer** — Links: Home, Blog, About Us, Privacy Policy, Terms of Service + copyright
-

MATERIAL DESIGN 3 DESIGN SYSTEM REQUIREMENTS

Color System (Material You — Dynamic Color)

Use a **deep violet-indigo primary** with these M3 tonal palette roles:

- --md-sys-color-primary: #6750A4
- --md-sys-color-on-primary: #FFFFFF

- --md-sys-color-primary-container: #EADDFE
- --md-sys-color-on-primary-container: #21005D
- --md-sys-color-secondary: #625B71
- --md-sys-color-secondary-container: #E8DEF8
- --md-sys-color-tertiary: #7D5260
- --md-sys-color-tertiary-container: #FFD8E4
- --md-sys-color-surface: #FFFBE
- --md-sys-color-surface-variant: #E7E0EC
- --md-sys-color-surface-container: #F3EDF7
- --md-sys-color-surface-container-high: #ECE6F0
- --md-sys-color-surface-container-highest: #E6E0E9
- --md-sys-color-outline: #79747E
- --md-sys-color-outline-variant: #CAC4D0
- --md-sys-color-error: #B3261E
- --md-sys-color-background: #FFFBE
- --md-sys-color-on-surface: #1C1B1F
- --md-sys-color-on-surface-variant: #49454F
- --md-sys-color-inverse-surface: #313033
- --md-sys-color-inverse-on-surface: #F4EFF4

Accent for PDF section: Use a **rich dark surface** — #1C1B1F background with #E8DEF8 (primary-container tint) for card surfaces inside.

Typography (Material Type Scale)

Load from Google Fonts: **Roboto** (weights 300, 400, 500, 700)

Apply M3 type roles strictly:

- Display Large — 57px / -0.25 tracking — Hero headline
- Display Medium — 45px / 0 tracking — Section headings
- Headline Large — 32px / 0 — Sub-section headings
- Headline Medium — 28px / 0 — Card titles
- Title Large — 22px / 0 — Feature titles
- Title Medium — 16px / 0.15 — Tab labels, nav links
- Body Large — 16px / 0.5 — Body text

- Body Medium — 14px / 0.25 — Supporting text
- Label Large — 14px / 0.1 — Button labels
- Label Medium — 12px / 0.5 — Badges, annotations

Shape (Corner Radius Tokens)

- --md-sys-shape-corner-extra-small: 4px
- --md-sys-shape-corner-small: 8px
- --md-sys-shape-corner-medium: 12px
- --md-sys-shape-corner-large: 16px
- --md-sys-shape-corner-extra-large: 28px
- --md-sys-shape-corner-full: 50px (pills, FABs)

Elevation (M3 Tonal Elevation — no hard shadows)

Use **tonal surface overlays** (not box-shadows) based on primary color:

- Level 0: Surface #FFFBFE
- Level 1: Surface + 5% primary overlay → #F5EEFF
- Level 2: Surface + 8% → #F0E9FF
- Level 3: Surface + 11% → #EBE3FF (Cards at rest)
- Level 4: Surface + 12% → #E9E1FF (App bars)
- Level 5: Surface + 14% → #E5DCFF (Floating elements)

Apply subtle box-shadow: 0 1px 2px rgba(0,0,0,0.07), 0 2px 4px rgba(0,0,0,0.05) only where M3 specifies elevation shadows (Elevated cards, FABs).

✿ SECTION-BY-SECTION DESIGN SPECS

1. Navigation Bar (M3 Top App Bar — Medium)

- Background: Surface container (#F3EDF7), elevation level 2
- Height: 64px
- Logo: Lightning bolt icon (SVG inline, #6750A4) + wordmark "FlashSuite" in Title Large, on-surface color
- Nav links in Title Medium weight, #49454F at rest, #6750A4 on hover with M3 state layer
- No hard underlines — use M3 **indicator** (pill-shaped background: #EADDFE, border-radius: 50px, padding 4px 16px) for active link
- On scroll: add M3 elevation shadow and blur backdrop backdrop-filter: blur(12px)

2. Announcement Banner

- Chip row centered below nav
- Use M3 **Suggestion Chips** with border: 1px solid #CAC4D0, border-radius: 8px, padding 6px 16px
- Icons: chain-link, QR code, file — Material Symbols outlined (load from Google Fonts Material+Symbols+Outlined)
- Chips: "Branded Links", "Custom QRs", "NEW: PDF Tools" (highlight last chip with background: #FFD8E4, color: #7D5260 for tertiary accent)
- Subtle separator dots between chips

3. Hero Section

- Background: Radial gradient from #F5EEFF (center) to #FFFBFE (edges) — creates a soft Material You glow
- Add very subtle background-image: radial-gradient(circle at 30% 50%, rgba(103,80,164,0.08) 0%, transparent 60%), radial-gradient(circle at 70% 30%, rgba(125,82,96,0.06) 0%, transparent 50%)
- Headline: Display Large, centered, color: #1C1B1F, max-width 780px
- Subtext: Body Large, color: #49454F, centered, max-width 520px
- Spacing: 80px top padding, 48px gap between headline and tool

Tab Switcher — M3 Primary Tabs:

- Tab bar with border-bottom: 2px solid #CAC4D0
- Active tab: border-bottom: 3px solid #6750A4, Label Large color: #6750A4
- Inactive: Label Large color: #49454F
- Tab icons inline (Material Symbols): link, qr_code_2, picture_as_pdf

URL Input + CTA — M3 Filled Text Field + Filled Button:

- Text field: background: #E6E0E9, border-radius: 12px 0 0 12px, 56px height, no border at rest, outline: 2px solid #6750A4 on focus
- Placeholder: "Paste your link here..." in Body Large, #79747E
- CTA button: background: #6750A4, color: #FFFFFF, border-radius: 0 12px 12px 0, 56px height, Label Large, padding 0 32px
- Button hover: background: #7965AF + M3 state overlay
- Button ripple effect on click (CSS animation)

4. PDF Toolkit Section — Dark Surface

- Background: #1C1B1F (M3 inverse surface)
- Padding: 80px vertical
- Section title: Display Medium, color: #E6E1E5 (inverse-on-surface), centered

- Subtitle: Body Large, color: #938F99, centered, max-width 560px

PDF Tool Cards — M3 Filled Cards:

- Grid: repeat(4, 1fr), gap 12px, max-width 1120px, centered
- Card background: #2B2930 (surface-variant on dark)
- Card hover: lift to #36343B + box-shadow: 0 4px 16px rgba(0,0,0,0.4)
- Border-radius: 16px
- Padding: 20px
- Icon: 40x40px container, background: rgba(103,80,164,0.3), border-radius: 12px, Material Symbols icon in #D0BCFF (primary on dark)
- Tool name: Title Medium, color: #E6E1E5
- Description: Body Small (12px), color: #938F99, 2-line max
- Transition: transform: translateY(-4px) on hover, transition: all 0.2s cubic-bezier(0.2, 0, 0, 1)

Icon mapping for PDF tools: crop → crop | merge → merge_type | split → call_split | compress → compress | pdf_to_word → description | pdf_to_image → image | image_to_pdf → upload_file | protect → lock | unlock → lock_open | edit → edit | sign → draw

"Explore All PDF Tools" CTA:

- **M3 Tonal Button:** background: #4A4458, color: #D0BCFF, border-radius: 50px, padding 14px 32px, Label Large
- Centered, margin-top 40px

5. About + How It Works — Two Column

- Background: #FFFBFE
- Max-width: 1120px, centered, 80px vertical padding
- Gap: 48px between columns

Left — "What is FlashSuite?" Card (M3 Elevated Card):

- Background: #F5EEFF (primary-container tint / elevation level 2)
- Border-radius: 28px (extra-large shape)
- Padding: 40px
- Headline: Headline Large, color: #21005D
- Body: Body Large, color: #49454F, line-height 1.7
- Add a decorative subtle M3-style blob shape in SVG (soft amorphous shape, fill: rgba(103,80,164,0.08)) positioned absolute behind the card text

Right — "How It Works" Steps:

- Title: Headline Large, color: #1C1B1F

- 3 Step Cards stacked vertically, gap 12px
- Each card: M3 **Outlined Card** — border: 1px solid #CAC4D0, border-radius 16px, padding 20px 24px
- Step number: 40px circle, background: #EADDFE, color: #21005D, Title Large font-weight 500
- Step title inline: Body Large, color: #1C1B1F, font-weight 500
- Step body: Body Medium, color: #49454F
- Steps: 1. Paste your URL 2. Click Shorten to generate a compact link 3. Copy and share across campaigns

6. Why Choose FlashSuite — Feature Highlights

- Background: #F3EDF7 (surface-container)
- Padding: 80px vertical
- Overline: Label Large, color: #6750A4, letter-spacing 1.5px, centered — "POWERFUL CAPABILITIES"
- Headline: Display Medium, centered, color: #1C1B1F
- Subtext: Body Large, centered, color: #49454F, max-width 520px

Feature Cards Grid — 4 columns, M3 Filled Cards:

- Card background: #FFFBFE
- Border-radius: 16px
- Padding: 28px
- Icon container: 56px circle, unique tonal background per feature:
 - Lightning Speed: background: #FFD8E4 (tertiary), icon #7D5260
 - Deep Analytics: background: #E8DEF8 (secondary-container), icon #625B71
 - Advanced UTM: background: #EADDFE (primary-container), icon #6750A4
 - Dynamic QR Codes: background: #E8DEF8, icon #625B71
- Feature title: Title Large, color: #1C1B1F, margin-top 16px
- Feature body: Body Medium, color: #49454F, line-height 1.6
- Card hover: box-shadow: 0 2px 8px rgba(103,80,164,0.12), 0 8px 24px rgba(103,80,164,0.08), translateY(-4px)

Icons (Material Symbols Outlined):

- Lightning Speed → bolt
- Deep Analytics → bar_chart
- Advanced UTM Tracking → track_changes

- Dynamic QR Codes → qr_code_2

7. FAQ Accordion

- Background: #FFFBFE
- Max-width: 720px, centered
- Left label: Label Large, color: #6750A4, "SUPPORT" overline
- Title: Headline Large, color: #1C1B1F
- Subtitle: Body Large, color: #49454F
- "Contact Support" button: M3 **Outlined Button** — border: 1px solid #6750A4, color: #6750A4, border-radius: 50px, padding 10px 24px

FAQ Items — M3 List with Dividers:

- Each item: border-bottom: 1px solid #CAC4D0
- Question: Title Medium, color: #1C1B1F, padding 20px 0
- Expand icon: Material Symbols expand_more, color: #49454F, rotates 180° on expand with transition: transform 0.3s cubic-bezier(0.2, 0, 0, 1)
- Answer: Body Large, color: #49454F, padding-bottom 20px
- Expanded state: question color changes to #6750A4
- JavaScript: smooth height animation using max-height transition

FAQ Questions:

1. What Is a URL Shortener?
2. How Does a URL Shortener Work?
3. What Are the Benefits of Using a Short URL?
4. How Do I Shorten a URL for Free?
5. How Do I Know Your Service Is Reliable and Scalable?

8. Footer

- Background: #1C1B1F (inverse-surface)
- Logo + tagline in #E6E1E5
- Nav links: color: #CAC4D0, Body Medium, hover → #D0BCFF
- Divider: border-top: 1px solid #49454E
- Copyright: color: #938F99, Body Small

INTERACTIONS & MOTION (M3 Motion Tokens)

Apply Google's M3 **Easing Curves** throughout:

- **Standard:** cubic-bezier(0.2, 0, 0, 1) — most transitions (300ms)
- **Emphasized decelerate:** cubic-bezier(0.05, 0.7, 0.1, 1.0) — elements entering screen (400ms)
- **Emphasized accelerate:** cubic-bezier(0.3, 0, 0.8, 0.15) — elements leaving (200ms)

Specific interactions:

- Nav links: M3 state layer (hover opacity 8%, pressed 12%) — CSS background overlay on pseudo-element
- Buttons: ripple effect from click origin using CSS animation
- PDF cards: translateY(-4px) + elevation increase on hover
- Feature cards: same lift effect
- FAQ: smooth accordion with max-height transition
- URL input focus: border-color transition with scale micro-animation on label
- Page load: staggered fade-up animation for hero elements (animation-delay increments of 80ms)
- Scroll-triggered: sections fade-in with IntersectionObserver + opacity: 0 → 1, translateY(24px → 0), 600ms emphasized decelerate curve

LAYOUT & SPACING SYSTEM

Use an 8px baseline grid throughout:

- Section vertical padding: 80px (10 × 8)
- Card internal padding: 24px (3 × 8)
- Grid gaps: 16px or 24px
- Max content width: 1120px, centered with margin: 0 auto
- Horizontal page padding: clamp(16px, 5vw, 80px)

Responsive breakpoints:

- Desktop ≥1200px: 4-column PDF grid, 4-column features
- Tablet 768px–1199px: 2-column PDF grid, 2-column features
- Mobile <768px: 1-column stack, hamburger nav, full-width cards

ICONS

Load **Material Symbols Outlined** from Google Fonts:

<link

href="https://fonts.googleapis.com/css2?family=Material+Symbols+Outlined:opsz,wght,FILL,GRAD@20..48,100..700,0..1,-50..200" rel="stylesheet">

Use `<span class="material-symbols-outlined">icon_name</span>` syntax throughout.

TECHNICAL REQUIREMENTS

- **Pure HTML + CSS + Vanilla JS** — no frameworks or external component libraries
 - All CSS in `<style>` tags using CSS custom properties for all M3 tokens
 - Semantic HTML5 (nav, main, section, article, footer, h1-h6 hierarchy)
 - WCAG AA accessible — proper contrast ratios, ARIA labels on interactive elements, keyboard-navigable FAQ
 - Smooth scroll behavior: `scroll-behavior: smooth`
 - Google Fonts loaded: `Roboto:wght@300;400;500;700 + Material+Symbols+Outlined`
 - No external JS libraries — all interactions in vanilla JS (<50 lines)
 - Performance: inline critical CSS, defer non-critical
-

WHAT TO AVOID

- No gradients that look like web 2.0 (no rainbow, no harsh linear gradients)
 - No box shadows that look heavy or dated
 - No hard-border cards without tonal surface backing
 - No all-caps body text
 - No font sizes below 12px
 - No colors outside the M3 tonal palette defined above
 - No generic Bootstrap or Tailwind patterns
 - No modal popups or elements requiring hover-only interaction on mobile
-

FINAL CHECKLIST

Before completing, verify:

- ☐ All 8 sections present and complete
- ☐ M3 color tokens applied consistently via CSS variables
- ☐ Roboto + Material Symbols loaded from Google Fonts
- ☐ Shape tokens (border-radius) matching M3 spec per component type
- ☐ State layers (hover, pressed, focused) on all interactive elements
- ☐ FAQ accordion working with smooth JS animation

- ☐ Tab switcher in hero functional (show/hide panels)
- ☐ Responsive at 375px, 768px, 1200px
- ☐ All 11 PDF tools present in the grid
- ☐ Staggered page-load animation on hero section
- ☐ Footer links and copyright present
